NIGERIA: THE EMERGING POWERHOUSE

Global Rank: 6th in population.

Urbanization: Over 53.9% (125 million people living in cities).

Median Age: Just 17.9 years—a youthful nation poised for growth.

As the global population nears 8.2 billion, the question is no longer about the size of populations but their significance.

3

WHO CONTROLS THE WORLD?

The global dynamic is clear:

- * 1% control resources and systems.
- * 4% execute their vision.
- * 90% remain unaware.
- * 5% see the truth and strive to awaken others.

THIS IS A THOUGHT-PROVOKING STATEMENT

According to the World Inequality Database (WID):

The wealthiest 10% control 75% of global wealth, while the bottom 50% hold almost none. The share of the top 0.01% has risen from 8% in 1995 to 12% in 2022.

The critical question is: Where do you stand in this equation?

4

THE SHIFT FROM NUMBERS TO IMPACT

In the modern era, being counted isn't enough—you must count for something.

Your value lies in your ability to:

- * Develop global relevance and leadership.
- * Deliver meaningful contributions in a competitive world.
- * Build networks and solutions that stand the test of time.

5

ASK YOURSELF THESE QUESTIONS

1. Am I part of the Significant Population (1%, 10%, or 0.01%) driving global change?
2. What is my worth, value, and impact in a world that rewards quality over quantity?
3. How can I position myself as indispensable in the global arena?

6

THE FUTURE IS FOR THE PREPARED

At Learn To Live Business School (LLBS), we empower individuals to:

- * Gain the skills to thrive in the global economy.
- * Elevate their utility and relevance to join the ranks of the Significant Population.
- * Transform their vision into impact that matters.

**Don't
Be Left
Behind.**
